

Project Report Template

Title of Project: PoorPhysical Health

Name of the Innovator: Sargunan S

Start date:13-10-2025

End Date: 16-10-2025

Day 1: Empathise & Define

Step 1: Understanding the Need

- Which problem am I trying to solve?

“ In Modern world everyone are focusing on only work and salary they are not even consider about their own body health so we need take care of our health in a good ways ”

- Who is affected by this problem?

Accountants, software developer,engineers,managers,administrative assistants ,lawers and etc;...

- How did I find out about this? [Select whichever is applicable]

- ☐ Interviews
- ☐ Observation
- ☒ Online Research
- ☒ AI Tools

Step 2: What is the problem?

The problem I want to solve in **one clear sentence** [Prompt: “I am ideating a solution for <enter your problem in detail> Convert this problem into a single clear sentence which I can share to an audience”]

“ I am ideating a solution for people who suffered by their physical health ”

Why is this problem important to solve? [Prompt: “Draft 1-2 lines on why is this problem important to solve. Support this with evidence using relevant data points”]

“ This problem is important to solve because poor physical health can affect our overall body health and down the immunity system, because it may cause various problem for our each body parts so we need to maintain our physical health in good way ”

Take-home task

Ask 2–3 people (you can speak to your family members, friends, teachers, trainers) what they think about this problem. Write down surprising or new things you learn below.

“I spoke to my mother, friend, and teacher — they said poor physical health is common due to stress, lack of exercise, and too much screen time. I was surprised to learn that even young people are getting health issues from sitting too much.”

AI Tools you can use for Step 1 and 2:

1. **ChatGPT:** Use it to brainstorm different ways the problem might affect people.
2. **Perplexity AI** (for research): Gather facts, stats, or examples related to the problem.

Day 2: Ideate

Step 3: Brainstorming solutions [Prompt: “I am ideating solutions for <enter your problem in detail> Suggest 5 unique solutions for this problem, which I can easily accomplish in 2 days using free, open-source mobile-friendly AI tools”]

- List at least 5 different solutions (wild or realistic):

1. **Create a Personalized Health Reminder Bot (No-code) Create a Personalized Health Reminder Bot (No-code)**
2. **Design a 2-Day Micro-Workout Plan with AI Help**
3. **Build a "Healthy Habits Tracker" in Google Sheets (with AI prompts)**
4. **Generate Voice-Based Stretching Reminders Using AI Voice**
5. **Create a Short Video Using AI Avatars to Promote Daily Movement**

Step 4: My favourite solution:

Design a 2-Day Micro-Workout Plan with AI Help

Step 5: Why am I choosing this solution?

“ Many people struggle with poor physical health due to lack of time, motivation, or resources. This solution gives them a short, easy-to-follow workout plan they can do at home — no equipment needed! ”

Take-home task

Generate the image of your solution and how it will look (eg: “a bag that charges your phone while you walk”)

[Prompt: “I am ideating a solution for <enter your problem in detail> I have selected a solution which includes <enter your solution description> Generate an image for this solution]

Attach the image in this box below:

AI Tools you can use for Step 3-5:

ChatGPT/Perplexity AI: You can use these tools to compare your solutions and choose the most effective one

AI Tools you can use for the take-home task:

Canva AI/CoPilot AI/Meta AI: Use these mobile-based tools to generate images for the solution they want to design

Day 3: Prototype & Test

Step 6: Prototype – Building my first version

- What will my solution look like?

[Take inspiration from the image generated on Day 2 and describe the solution]

Even small steps towards fitness can create big changes — with AI as your guide, every move counts.

- What AI tools will I need to build this?

[Prompt: “I am ideating a solution for <enter your problem in detail> I have designed a solution which includes <enter your solution description> What open-source, free AI tools that I can use to build this solution? The tools should be easily available and accessible on my mobile. Do not recommend tools which requires cost or subscription”]

Teachable Machine (by Google), MediaPipe (by Google)

- What AI tools I finally selected to build this solution? [Eg: Claude AI, Grok AI, Chatling AI]
 1. Teachable Machine (by Google)
 2. MediaPipe (by Google)
 3. Google Fit API

<BUILD YOUR INNOVATION> <TEST YOUR INNOVATION>

Step 7: Test – Getting Feedback

- Who did I share my solution with? [You may share it with your trainer, peers or even AI]

Trainer

- What feedback did I receive?

This project creatively combines AI and fitness to promote healthier lifestyles through simple, personalized workouts. It’s practical, innovative, and highly accessible for everyday users

👍 What works well:

🔧 What needs improvement:

“The project can be improved by adding progress visualization and voice feedback features to enhance user motivation. Integrating offline functionality would also make it more accessible for all users.”

Take-home task

Record your solution and test feedback in voice notes. Upload your voice notes, images and your solution/model on GitHub

AI Tools you can use for Step 6-7:

ChatGPT/Perplexity AI/Claude AI/Canva AI/Chatling AI/Figma AI: You can use these tools to build solutions/models or mock-up dummy prototypes

Day 4: Showcase

Step 8: Presenting my Innovation

- Final Project Title:

POOR PHYSICAL HEALTH

- Document key points of my presentation:

[Prompt with attachment/screenshot of your solution: *"I am ideating a solution for <enter your problem in detail> I have selected a solution which includes <enter your solution description> I tested the solution with <enter details of who tested your solution> and they gave the following feedback <enter feedback given by the testers> Generate a 1-minute pitch document with following headings: project title, problem statement, my innovation, feedback I received from users, impact of my innovation. Add the attached image in the pitch document"*]

Project Title: AI-Powered 2-Day Micro-Workout Plan

Problem Statement: Poor physical health due to sedentary lifestyle and lack of time for exercise.

My Innovation: Short, AI-guided home workouts with posture correction, progress tracking, and motivation.

Feedback: Users found it easy, engaging, and motivating; suggested adding progress visualization and voice guidance.

Impact: Makes fitness accessible, personalized, and consistent for busy lifestyles.

<SHOWCASE YOUR INNOVATION TO YOUR PEERS>

Step 9: Reflections

- What did I enjoy the most during this project-based learning activity?

I am enjoying during to know about AI uses

- What was my biggest challenge during this project-based learning activity?

To collect the information about this project

Take-home task

Upload your pitch document on GitHub

AI Tools you can use for Step 8:

Canva AI: You can use this to design your pitch document. Download your pitch document as a PDF file and upload on GitHub
